

KRISHAN LAL

Senior React Native Developer | 4.7+ Years Experience

Panchkula / Chandigarh, India | 9992724729 | kl268369@gmail.com | [LinkedIn: krishan-lal](#)

PROFESSIONAL SUMMARY

Senior React Native Developer with 4.7+ years of experience architecting and shipping production-grade Android and iOS apps end-to-end. Specialized in real-time systems — WebRTC, LiveKit and Telnyx-powered audio/video calling, live streaming, and WebSocket chat — plus native iOS/Android bridge development for AR and 3D features. Delivered high-performance social platforms, on-device AI chat, and secure multi-gateway payments (Stripe, PayPal, Apple Pay, Paydunya) across 20+ production apps.

TECHNICAL SKILLS

Mobile: React Native, JavaScript, TypeScript, Android, iOS, React Native CLI

State & Architecture: Redux Toolkit, Redux, Context API, reusable components

Real-Time & Media: WebRTC, LiveKit, Telnyx, WebSocket, Socket.IO, Live Streaming, Audio/Video Calling

AI / AR / 3D: SLM-based offline AI chat, 3D View, AR Try-On, native bridge integration

Payments: Stripe, PayPal, Apple Pay, Paydunya, Pay Stack

APIs & Services: REST APIs, Firebase, Push Notifications, Auth, Google Maps, third-party SDKs

Tools & Release: Git, GitHub, GitLab, Postman, Android Studio, Xcode, Flipper, App Store, Play Store

PROFESSIONAL EXPERIENCE

Software Engineer — ToXSL Technologies

Jan 2022 – Present

- Built and shipped production Android/iOS apps in React Native, JavaScript and TypeScript from first commit through store release.
- Added live streaming, audio/video calling and WebSocket chat to multiple products, including a WhatsApp-style messaging flow with delivery states and typing/online indicators.
- Wired up WebRTC, LiveKit and Telnyx for real-time media — publishing, subscribing and call signaling.
- Bridged native iOS/Android modules to bring 3D View, AR Try-On and camera-based features into React Native.
- Built an SLM-based offline AI chat feature that works without a live connection.
- Handled REST API, Firebase, push notification, maps and auth integrations, plus production debugging, working closely with backend, QA, design and product.

SELECTED PROJECTS

- **ORB (Current)** — Real-time mobile product end-to-end — live streaming, audio/video calling, chat, SLM-based offline AI chat, and Instagram-style social layer with AR/3D features.
- **Alpha Padel** — Tournament & live-streaming platform with Player, Referee and Center Manager roles; built tournament management and paid live-streaming flows.
- **DubiSale** — Marketplace app — real-time chat, listing discovery, bidding/auction flows and location-based search.
- **ABG NextLevel** — Workforce management app — job assignment, scheduling, GPS tracking, calendar sync and digital signatures. | [App Store](#) | [Play Store](#)
- **Ship Swift (Driver / Customer)** — Delivery and order tracking app with live tracking, Socket.IO and push notifications. | [Driver App](#) | [Customer App](#)
- **Baligan** — Multi-role education app connecting teachers, students and parents with real-time media sharing and Firebase push notifications. | [App Store](#) | [Play Store](#)
- **Mazady** — E-commerce marketplace with Apple Pay checkout, location-based address selection and bidding/auction flow. | [App Store](#)

EDUCATION

Bachelor of Computer Applications (BCA) — Kurukshetra University, 2021

Diploma in Computer Application — Sewak Computer Training Institute, 2018

LANGUAGES

English, Hindi
