KRISHAN LAL

Senior React Native Developer | 4.8+ Years Experience

Panchkula / Chandigarh, India | +91 9992724729 | kl268369@gmail.com | Website: krishanlal.is-a.dev

PROFESSIONAL SUMMARY

Senior React Native Developer with 4.8+ years of experience architecting and shipping production-grade Android and iOS applications end-to-end. Specialized in real-time systems — WebRTC, LiveKit and Telnyx-powered audio/video calling, live streaming, and WebSocket chat — plus native iOS/Android bridge development for AR and 3D features. Delivered high-performance social platforms, on-device AI chat, and secure multi-gateway payments (Stripe, PayPal, Apple Pay, Paydunya) across 20+ production apps.

TECHNICAL SKILLS

Mobile:	React Native, JavaScript, TypeScript, Android, iOS, React Native CLI
State & Architecture:	Redux Toolkit, Redux, Context API, reusable components
Real-Time & Media:	WebRTC, LiveKit, Telnyx, WebSocket, Socket.IO, Live Streaming, Audio/Video Calling
AI / AR / 3D:	SLM-based offline AI chat, 3D View, AR Try-On, native bridge integration
Payments:	Stripe, PayPal, Apple Pay, Paydunya, Pay Stack
APIs & Services:	REST APIs, Firebase, Push Notifications, Auth, Google Maps, third-party SDKs
Tools & Release:	Git, GitHub, GitLab, Postman, Android Studio, Xcode, Flipper, App Store, Play Store

PROFESSIONAL EXPERIENCE

Software Engineer (Mobile Lead) — ToXSL Technologies Pvt. Ltd.

Jan 2022 – August 2026

- Built and shipped production Android/iOS apps in React Native, JavaScript and TypeScript from first commit through store release.
- Added live streaming, audio/video calling and WebSocket chat to multiple products, including a WhatsApp-style messaging flow with delivery states and typing/online indicators.
- Wired up WebRTC, LiveKit and Telnyx for real-time media — publishing, subscribing and call signaling.
- Bridged native iOS/Android modules to bring 3D View, AR Try-On and camera-based features into React Native.
- Built an SLM-based offline AI chat feature that works without a live connection.
- Handled REST API, Firebase, push notification, maps and auth integrations, plus production debugging, working closely with backend, QA, design and product.

KEY PRODUCTION PLATFORMS

- **ORB** — Real-Time Social + AI `FLAGSHIP / CURRENT`
  Tech Stack: React Native • TypeScript • WebRTC • LiveKit • Telnyx • SLM AI • AR/3D Native Bridge
  Next-generation real-time mobile platform with low-latency WebRTC/LiveKit live streaming, audio/video conferencing, WebSocket messaging, offline on-device SLM AI chat, and native AR Try-On / 3D model visualization.
- **Alpha Padel** — Padel Tournament & Live Streaming `DUAL STORES` [App Store ↗]
  Tech Stack: React Native • REST APIs • LiveKit • Redux Toolkit • Stripe Payments
  Comprehensive padel tournament ecosystem featuring live match video streaming, interactive bracket trees, referee scoring consoles, club court booking, and instant push notification alerts.
- **DubiSale** — Classified Marketplace `APP STORE` [App Store ↗]
  Tech Stack: React Native • Socket.IO • Google Maps • Push Notifications • Image Pipeline
  High-volume UAE marketplace application featuring real-time buyer-seller chat, location-filtered classified listings, instant auction bidding, automated multi-currency conversion, and verified seller badges.
- **ABG NextLevel** — Workforce Management Suite `DUAL STORES` [App Store ↗] [Play Store ↗]
  Tech Stack: React Native • REST APIs • High-Accuracy GPS Tracking • Google Calendar Sync • Payments
  Mobile platform for employees to manage jobs, schedules and communication in one place. Features real-time job assignment, status updates, time tracking, document handling, GPS tracking, and digital signature capture.

ADDITIONAL STORE APPS & DEPLOYMENTS

- **Ship Swift** — On-Demand Logistics Platform APP STORE (DUAL APPS) [Driver App ↗] [Customer App ↗]
  Tech Stack: React Native • REST APIs • Google Maps • Socket.IO • Dispatch Algorithms
  End-to-end logistics platform consisting of two dedicated mobile apps: a high-efficiency Driver app with turn-by-turn routing and order lifecycle management, and a real-time Customer app with live vehicle telemetry and digital dispatch.
- **Baligan** — Multi-Role Education & Kindergarten DUAL STORES [App Store ↗] [Play Store ↗]
  Tech Stack: React Native • Firebase • Media Pipeline • Push Notifications • Complete RTL Localization
  Multi-role education platform connecting teachers, students and parents. Built communication and media-sharing flows, daily teacher photo/update posts, image/video gallery with native download support, and complete RTL localization.
- **Mazady (مزادي)** — Live Auction & Marketplace APP STORE [App Store ↗]
  Tech Stack: React Native • Apple Pay Express • REST APIs • Push Notifications • Arabic RTL Layout
  Lebanese auction and marketplace platform featuring live item bidding, Apple Pay express checkout, location-based address selection, seller verification flows, and full Arabic RTL layout support.

OTHER PRODUCTION PLATFORMS & HIGHLIGHTS

- **Enterprise & Consumer Deployments (15+ Apps):** Architected and delivered **IHub** (Logistics & F&B with Pay Stack), **Place Com** (Campus Placement Portal), **Lean Dispatch** (Multi-Vendor SLA Logistics), **Scope** (Survey Analytics & WebSocket Chat), **Smart-Work** (Auto Mechanic Booking), **Presstix** (Ticketing with Paydunya), **Doktu App** (Serverless Firebase Telehealth), **E-Sanchari** (Rental & Yacht Booking), and **Poised** (AI-Assisted Smart Inventory).

EDUCATION

Bachelor of Computer Applications (BCA) — Kurukshetra University, 2021

Diploma in Computer Application — Sewak Computer Training Institute, 2018

LANGUAGES

English, Hindi
